

# People are the weakest link

More than ever, employees are the weak link in an organisation's network security. They are frequently exposed to sophisticated phishing and ransomware attacks.

Employees need to be trained and remain on their toes with security top of mind. Here at Cyberfort we offer the world's largest integrated Security Awareness Training and Simulated Phishing platform, from our partner KnowBe4.

## 83%

Of organisations reported experiencing phishing attacks.

(cybertalk.org)

## 6B

In 2022, an additional 6 billion attacks are expected to occur.

(cybertalk.org)

## 214K

In 2021, roughly 214,345 unique phishing websites were identified.

(cybertalk.org)

Security awareness training is a technique used by IT and security professionals to prevent and mitigate user risk. These training programs help to prevent information and cybersecurity breaches.

An effective security awareness training program helps employees understand the benefits of proper cyber hygiene, the security risks related to their actions and to help identify cyber attacks that they may encounter via email, web and telephone calls.

### New to KnowBe4?

### Already a KnowBe4 User?

#### THE BENEFITS OF A KNOWBE4 LICENCE

##### STRENGTHEN

Any organisation can strengthen security through end-user training in as little as three months.

##### TOOLS

Free IT security tools such as weak password test, phish alert button, ransom simulator, domain spoof test and much more.

##### VIRTUAL RISK OFFICER

Provides insight and actionable metrics that will allow you to understand the attack surface of your organisation, and learn which users might be more vulnerable to a phishing attack.

##### PERSONALISED

Deliver a personalised simulated phishing experience to every single user. The platform leverage's machine learning to automatically choose the best phishing security test template for each user.

##### NETWORK

Prevent hackers from getting into your network.

#### INCREASE YOUR ROI WITH OUR MANAGED SERVICE

##### TESTING

We provide baseline testing to assess the Phish-prone percentage of your users.

##### RESULTS

We will give you the visibility from both high-level and granular stats and graphs for management reports.

##### TRAINING

We provide you with access to the world's largest library of security awareness training content; including interactive modules, videos, games, posters and newsletters.

##### REPORTING

We help you develop a transparent and concise process for employees to report phishing emails. We will help you to implement a phishing report button.

##### USERS

We will fully automate simulated Phishing, Vishing and Smishing attacks from thousands of templates.

Why not start by finding out where your users are in both security knowledge and security culture?

With KnowBe4, you will have the ability to send skills-based assessments and a security culture survey to your users and strengthen your security culture posture over time.

## COMMITTED TO SECURING YOUR INVESTMENT

Many IT pros don't exactly know where to start when it comes to creating a security awareness program that will work for their organisation.

With Cyberfort and KnowBe4 all the guesswork has been taken away. Together we are able to create a customised programme for your organisation that implements all the steps to create a complete security awareness training program.
